What are Jamberry Nails?

Jamberry Nail Wraps are a solid film covering that can be applied directly to the nail to achieve a look not found anywhere else. This special material is both pressure and heat activated (like with a blow dryer) to create a water tight bond to your nail. The wraps are made in the USA, with no harsh chemicals and are latex free.

This new nail treatment can be easily applied at home. In addition to these custom Timber Creek wraps, we have over 300 designs in our catalog, plus holiday and seasonal wraps. Unlike traditional polish, they won't chip and require no drying time. You can achieve a professional, salon look at a fraction of the price - and support Timber Creek Wrestling at the same time!
